BF SPORT SUBLI CAD CAM

PRODUCT DESCRIPTION

The BF SPORT SUBLI series is made up of an opaque microperforated polyurethane film, designed to give greater character and style to sports uniforms.

This film, available only in white, was created for heat transfers on synthetic fabrics printed with sublimation; With just 80 microns of thickness, the exceptional barrier inserted in the polyurethane film prevents the migration of pigments while maintaining the color of the film unchanged, even after numerous washes.

BF SPORT SUBLI is completely opaque and does not let the underlying color show through.

The highly visible cutting lines and the workability of the product make this film unique.
